Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. Description of Request: The licensee proposes to remove from the project boundary two 7.6-mile-long, 69-kilovolt (kV) transmission lines which no longer qualify as primary transmission lines. These lines, referred to as the A-2 and B-2, formerly

connected the Leaburg Substation with the Walterville Substation and then to load centers and the interconnected transmission system at the Hayden Bridge Substation. The A-2 and B-2 transmission lines have been taken out of service and the licensee is removing them. The licensee installed a new 11.5-kV generation feed line between the Leaburg power plant and the new Holden Creek Substation in the easternmost 0.43 mile of the right-of-way previously occupied by the two 69-kV transmission lines. The Leaburg plant's power generation is now delivered to the interconnected transmission system at the Holden Creek Substation, which is connected to the Bonneville Power Administration. The proposed amendment would reduce the project transmission line right-of-way by 117.08 acres; from 180.86 to 63.78 acres.
